

## 8000 LOW PROFILE DECORATIVE ROUNDS

RLR Industries, Inc. is proud to introduce our new 8000 Low Profile Decorative Round series of fixture components.

The fixture component set consists of a housing which is stamped and spun, creating a floating effect on the mounting surface. This effect is further reinforced with the utilization of a shallow dome diffuser, in either white, clear prismatic, or Dani-Lite™ prismatic colored diffusers. The diffusers mount to the fixture housing with the use of three spring clips, which compress the flange on the diffuser inside the fixture housing. The diffusers are constructed of 50% acrylic and 50% DR acrylic to allow of the easy mounting and accessibility of the diffuser to the housing.

The color choices for the housing consist of White, Polished Brass, and Brushed Nickel. There are three diameters of size to choose from with a variety of lamping options in each size.

Fax:(770) 948-1389

## ASSEMBLY PROCEDURE

To attach, push diffuser in towards one side until flange hits inside of housing, then center lens in housing. Diffuser snaps into housing against spring clips.

To detach, push diffuser in towards one side and pull exposed diffuser out of housing with fingertips or a straight edge.

## DIMENSIONS

Size	A	B	C	D	Lamping Options
